Cat.No.EC90011892

SC 11  (kidney, Mouse)

Culture Medium:
EMEM (EBSS) + 2mM Glutamine + 1% Non Essential Amino Acids (NEAA) + 15% Fetal Bovine Serum (FBS).

Cell Line Description:
Derived from marsupial mouse. Used in UV damage and repair studies.

DESCRIPTION OF REPOSITORY REFERENCE SEED STOCK

Morphology: Fibroblast
Sub Culture Routine: Split sub-confluent cultures (70-80%) 1:2 to 1:4 i.e. seeding at 3-5
× 10,000 cells/cm² using 0.25% trypsin; 5% CO₂; 37 °C.
Karyotype: Not specified
Depositor: Dr C Arlett, MRC Cell Mutation Unit, University of Sussex
Originator: Yes
Country: UK
References: Mutation Res 1983;111:263
